

GRADENIK

COMIC BOOK GRADER — CLOSED TESTING PROGRAM

Welcome, Tester!

Thanks for helping try out GRADENIK before public launch. There's nothing you need to prepare or read first — just install it, grade a comic or two, and see what you think. Take as long as you like.

1. Getting Access

You should have received (or will receive) an invitation email from Google Play to join the closed testing track.

- Open the invitation link on your Android device.
- Accept the invite to become an official tester.
- Install GRADENIK from the Play Store link provided.
- Open the app — no extra permissions are required to use it.

2. Give It a Try

Grab a comic or two from your own collection and run them through a grading session. That's really it — there's no set number of comics to test and nothing you need to track or write down as you go.

3. Got Thoughts? We'd Love to Hear Them (optional)

If something felt off, confusing, or surprising — or if you just want to share how a grade compared to what you expected — feel free to drop us a line. There's no obligation to report on every comic you try, or any comic at all. Whatever's easiest for you.

Email: **support@gradenik.com**

Subject line: *GRADENIK Tester Feedback – [Your Name]*

For a closer look at how the grading works — including example defect combinations for each grade level — check out the companion Grade Recipe Book. It's entirely optional and just there to make your experience more enjoyable if you're curious.

GRADENIK is an independent app built by a solo developer. Thank you for being part of it.
